PROFILE SUMMARY

Information Technology undergraduate with a strong interest in web development, product innovation, and solving real-world problems. Passionate about researching challenges from multiple perspectives and designing scalable, user-centric solutions. Experienced in building projects, leading teams, and participating in hackathons. currently enhancing skills through the MERN Stack and web development

PROJECTS

uplyft

- Built a platform that bridges the gap between academic learning and industry expectations for freshers.
- Tech Stack:** JavaScript (ES6+), HTML5, CSS3, Git, GitHub, Netlify
- Approach:** Developed a career growth platform that helps freshers overcome challenges such as scattered information, lack of guidance, and limited industry awareness.
- Built features for internship discovery, resume creation, career roadmaps, and community-driven knowledge sharing.
- Designed a peer-support community where users can share experiences, career journeys, setbacks, comebacks, and learning resources.
- Created a structured ecosystem to bridge the gap between academic learning and real-world industry expectations.
- Architected the platform with scalability in mind to support future AI-driven resume analysis, personalized opportunity matching, and skill development features.
- Future Scope:** Designed a career growth ecosystem featuring challenge-based learning, industry simulations, community engagement, and AI-driven internship matching, while enhancing the platform with MERN stack integration for scalability and personalized user experiences.
